

ABE Special Lecture, No.3

NEC's Smart Energy Business towards African Countries' Growth

Smart Energy Division,
NEC Corporation
Senior Manager,
Global business development

Ken'ichi ISHII

Mr. Ishii entered NEC over 20 years ago. He started his carrier as researcher at central research labs on wireless communication system like 3G mobile and Wi-Fi. He expanded his business domain not only for wireless communication system but also for other cutting edge business domain like mobile location based service system (e.g. Navigation service for mobile devices), Electric Vehicle charging station network system, residential energy storage monitoring and control cloud based system, and etc. Currently, he is responsible for Smart Energy business development outside Japan. Especially, he is working on energy management system for mobile telecom tower which can reduce diesel fuel consumption at the towers in remote area.

Date

Friday, May 20th, 2016

Time

15:30-17:30

Place

C501
